Professional Summary

Economics and Mathematics undergraduate with experience in capital markets data, financial statement analysis, and market research. Strong foundation in quantitative analysis, financial reporting, and economic modeling, with practical exposure from the Nairobi Securities Exchange and Insurance sector operations.

Technical Skills

Data & Analytics: SQL, Python, R, Power BI, Advanced Excel

Analysis: Statistical analysis, data cleaning & transformation, dashboarding, exploratory analysis

Finance & Economics: Economic analysis, financial statement analysis, capital markets research

Tools & Methods: Git, Agile methodologies

Relevant Experience

NAIROBI SECURITIES EXCHANGE (NSE) | *Trading & Data Analytics Intern* | Nov 2025- Feb 2026

Validated and digitized 25+ years of corporate action data (splits, bonuses, dividends) across 63 listed firms, improving historical data accuracy and consistency.

Structured and standardized longitudinal financial statements (2000–2024) to support market research and trend analysis.

Supported data quality checks and documentation for capital markets datasets used in internal research and reporting.

GA INSURANCE | *CX (Customer Experience) Intern* **| June 2025 – Nov 2025**

Calculated and monitored **Turnaround Time (TAT)** metrics to identify workflow bottlenecks and service inefficiencies.

Analyzed **CSAT scores and qualitative feedback** to extract trends and translate client pain points into actionable recommendations.

Presented data driven insights to non technical teams, improving clarity and decision making across service functions.

.

Projects

SDG 6: Water Accessibility Analysis - *ALX Data Analytics*

- Cleaned and transformed multi-region datasets using **SQL** to assess disparities in clean water access.
- Built **interactive Power BI dashboards** highlighting regional gaps in water quality, affordability, and availability.
- Applied **advanced Excel functions** to compute access, affordability, and quality metrics for comparative analysis.
